Symptom

You need information on the expected release dates of the next SAP GUI for Windows patch. You will also be informed via this SAP Note if a patchlevel was skipped or a patch should not be used.

The calendar week number that is given below means the week number from the ISO week date system (see e.g. http://en.wikipedia.org/wiki/ISO_week_date).

Planning dates for the next release (for example SAP GUI for Windows 8.00 - see also SAP Note 147519) will be added a couple of months prior to the delivery of the new release.

Other Terms

patches, patch, SAP GUI, SAPGUI, correction, fix, release, date

Reason and Prerequisites

IMPORTANT NOTE The dates given in this SAP Note are just estimates and can change anytime. We cannot give you definite shipment dates for patches since the patches undergo a QA procedure before being delivered. In case of errors being found during the tests of a patch the shipment of the patch has to be postponed until the errors have been resolved and a successful test has been performed. In general patches for SAP GUI for Windows are shipped every 6-12 weeks, but depending on the results of our tests this may vary. This SAP Note is only available in language EN (English).
