

## 3677404 - EAM order: Runtime error NOT\_FOUND\_OL

Component: PM-WOC-MO (Plant Maintenance > Maintenance Order Management > Maintenance Orders),  
Version: 2, Released On: 06.11.2025

### Symptom

When you display or edit operations of an EAM order, the runtime error NOT\_FOUND\_OL is triggered and a program termination occurs.

### Other Terms

IW32, IW33, OBJK, OPROL, AUFPL, APLZL, OBKNR, OBZAE, RAISE\_EXCEPTION, NOT\_FOUND\_OL, IWOL, IWOL\_GET\_OL\_ENTRY, INSPR\_OPEN\_SCREEN\_FIELDS, INSPECTION\_ROUND\_TO\_PBO

EAM\_SFWS\_SC3, LOG\_EAM\_CI\_3

EAM order, maintenance order, PM order, CS order, service order

### Reason and Prerequisites

#### Reason

This is caused by a data inconsistency. An order operation refers to a nonexistent object list entry.

#### Prerequisite

In the "Define Notification and Order Integration" customizing activity, for the order type under "Enh. ObjectList", you have defined the value "Assignment of Operations to Maint. Plan Notifications Active" or "Assignment of Operations to All Notifications Active" or "Assignment of Operations to All Object List Entries Active".

The switch EAM\_SFWS\_SC3 for the business function LOG\_EAM\_CI\_3 is activated.

## Solution

Implement the correction instruction.

This SAP Note prevents the occurrence of such data inconsistencies.

You can correct existing data inconsistencies using the program Z\_CORR\_OBJ\_LIST from SAP Note 25394444.

## Attributes

Key	Value
Other Components	Customer Service (formerly: PM-SM) > Service Execution (CS-SE)
